

# **Climate Change Plays**

Name:

Date:

Pick an aspect of climate change that interests you. In groups of 2 - 6, you will first research your topic and find out as much as you can about it. After that, as a group, you will be writing your scripts and then performing your plays to the class. Your play should be 5 - 8 minutes long.

**IMPORTANT:** Once you have decided on your topic, check in with your teacher before starting your research. Please staple your notes to this page when handing in your research notes.
