

MARY IRWIN THEATRE

Stage dimensions: A soft proscenium end stage with a standard maximum playing width of 30' and a playing depth upstage from the proscenium of 28'. This stage area has a "D" thrust, which has a maximum centreline depth downstage of the proscenium of 10'. Given a 30' proscenium, and 8' legs, the stage right wing is a 2 1/2' wide while the stage left wing is 15' wide by 16' feet high for most of the stage depth. One pillar obstructs the wing down left. The rear crossover is 11' wide at its maximum, accessible by a 14 1/2' wide 16' high opening in the back wall, which permits some operational storage. The stage left wing access is 9 1/2' high by 7 1/2' wide.
